

Carbohydrate-based Vaccines

London.

Ian Feavers is Head of Bacteriology at the NIBSC, UK. In addition to his active research programme on the molecular genetics and immunology of meningococcal and pneumococcal antigens, his laboratory is responsible for the control of meningococcal and pneumococcal vaccines. With a broad experience of bacterial vaccines and molecular biology, he is closely involved with a number of vaccine developments. He regularly contributes to WHO and EU guidelines and is a Visiting Professor at Imperial College,

Chris Jones is Head of the Laboratory of Molecular Structure at the National Institute for Biological Standards and Control, South Mimms. He has been involved in the characterisation and quality control of polysaccharide and glycoconjugate vaccines, and in the development of international regulatory standards for these products.
